

REMARKS

The above amendments to the above-captioned application along with the following remarks are being submitted as a full and complete response to the Office Action dated August 25, 2005. In view of the above amendments and the following remarks, the Examiner is respectfully requested to give due reconsideration to this application, to indicate the allowability of the claims, and to pass this case to issue.

Status of the Claims

As outlined above, claims 1 – 10 are currently pending, wherein claim 2 is being amended to correct formal errors and to more particularly point out and distinctly claim the subject invention.

Additional Amendments

The specification is being amended to correct formal errors and to better disclose and describe the features of the present invention as claimed. Applicant hereby submits that no new matter is being introduced into the application through the submission of this response.

Formal Objections or Rejections

The Examiner objected to the Title of the Invention as being non-descriptive and had requested a new title. Further, the Examiner objected to claims 2 and 3, and to page 4, line 4 of the specification due to various informalities and requested corrections thereof.

As outlined above, the title, specification and claims are being amended in accordance with the Examiner's requirements. As such, all the outstanding formal objections and rejections are hereby rendered moot.

Allowable Subject Matter

As indicated by the Examiner, claims 1 – 10 are allowable pending the amendment of the claims to overcome the formal objection. In view of the above-outlined amendments, Applicants will submit that the claims are now in condition for allowance.

Conclusion

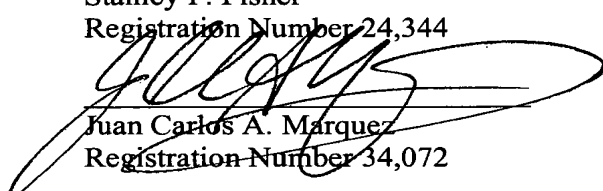

In view of all the above, Applicant respectfully submits that certain clear and distinct differences as discussed exist between the present invention as now claimed and the prior art

as a whole. These differences are more than sufficient that the present invention as now claimed would not have been anticipated nor rendered obvious given the prior art. Rather, the present invention as a whole is distinguishable, and thereby allowable over the prior art.

Favorable reconsideration of this application as amended is respectfully solicited. Should there be any outstanding issues requiring discussion that would further the prosecution and allowance of the above-captioned application, the Examiner is invited to contact the Applicant's undersigned representative at the address and phone number indicated below.

Respectfully submitted,
